ASPHALT & CONCRETE

Concrete w/ OR w/o Rebar	Eagle County C&D Diversion Site - Check for asbestos, Concrete chunks 2ft. in diameter max.
Concrete Washout	<p>Cost: \$15/ton, Cost savings of \$33/ton compared to \$57 for landfill tipping fee. SAVE MONEY!</p> <p>Required: You must contact the facility for approval PRIOR to hauling a load.</p> <p>Contact Jesse Masten, Solid Waste & Recycling Division Chief: jesse.masten@eaglecounty.us, (970)328-3472</p> <p>Please see requirements at: www.eaglecounty.us/departments_services/solid_waste_recycling/landfill.php</p>

BUILDING MATERIALS

Functional Furniture, Cabinet Sets, Doors, and Appliances	<p>Habitat for Humanity ReStore - Email with photos, call in advance to confirm acceptable materials, or visit habitatvailvalley.org/restore/donate. Pick-up may be available.</p> <p>(970) 328-1119, restore@habitatvailvalley.org, habitatvailvalley.org/restore/donate</p>
-----------------------------------------------------------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

CLEAN WOOD WASTE (unpainted & untreated)

Clean Dimensional Lumber	<p>Eagle County C&D Diversion Site - No treated wood, no adhesives, no painted lumber, Scrap studs are okay.</p> <p>Cost: \$15/ton, Cost savings of \$33/ton compared to \$48 for landfill tipping fee. SAVE MONEY!</p> <p>Required: You must contact the landfill for approval PRIOR to hauling a load.</p> <p>Contact Jesse Masten, Solid Waste & Recycling Division Chief: jesse.masten@eaglecounty.us, (970)328-3472</p> <p>Please see requirements at : www.eaglecounty.us/departments_services/solid_waste_recycling/landfill.php</p>
--------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

LANDSCAPING MATERIALS

Yard Waste & Compost	<p>Vail Honeywagon, (970) 476-3511, vailhoneywagon.com</p> <p>EverGreen ZeroWaste, (970) 930-7900, info@evergreenzerowaste.com</p>
----------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

RECYCLING MATERIAL

Recycling & Cardboard	<p>Call ahead to confirm pricing for hauling services. Cardboard: Flattened, clean, tape is okay. No Styrofoam, plastic wrap, or bubble wrap.</p> <p>Vail Honeywagon - (970) 476-3511, Vail Valley Waste - (970) 977-9228, APEX Waste Solutions (970) 524-1800</p>
Wash out pans	<p>Trinity Recycling - (970) 328-5051, trinityrecycle.com</p> <p>Eco pan - eco-pan.com</p>
Scrap Metals	<p>Trinity Recycling - (970) 328-5051, BE PAID FOR RECYCLING SCRAP METALS \$</p> <p>List of materials: Call to Confirm, Copper, Aluminum, Brass, Steel, Iron, Stainless Steel</p>

Questions or need assistance from a waste expert, visit walkingmountains.org/wizard and go to "Ask a Question".

BENEFITS OF RECYCLING AND REUSING C&D MATERIALS

- Save money:** Donating and recycling construction materials reduces landfill expenses and increases tax benefits. Selective deconstruction is cost-competitive with demolition.
- Save the planet:** If 25% of the total construction and demolition (C&D) waste were recycled each year in the U.S. there would be a reduction of 40 million metric tons of carbon dioxide equivalent (EPA, 2009).
- Save resources:** Reuse & recycling reduces the demand for virgin materials. Concrete creation is said to be responsible for 4-8% of the world's Carbon dioxide (CO2) emissions. C&D materials make up around 25% of the total solid waste generated in Colorado.
